

LIFTING WITHOUT SURGERY

With the ACCOR corrector, you have the option to treat a number of issues which traditionally would have needed surgery. You can:

- ✓ Achieve eye-lid lifts - non-surgical blepharoplasty
- ✓ Tighten skin on the neck and jaw line
- ✓ Dramatically reduce lines and wrinkles
- ✓ Remove skin tags
- ✓ Lighten sun pigmentation
- ✓ Resurface acne scarred skin

IS THIS TREATMENT FOR ME?

If you are considering skin tightening or even an eye-lid or neck lift, but do not want to go under the knife, then this may be just the treatment for you. This treatment is completely non-invasive although there is still a degree of downtime as the treated area heals and skin rejuvenates.

CONTRAINDICATIONS TO THE TREATMENT?

There are a number of contraindications to having treatment, these include:

- ◆ Pregnancy
- ◆ Autoimmune disease
- ◆ Diabetes Haemophilia
- ◆ HIV
- ◆ Hepatitis
- ◆ Cancer
- ◆ Herpes
- ◆ Epilepsy
- ◆ Pacemaker
- ◆ Keloid tendencies
- ◆ Heart disease

Medications and the use of fillers / Botox and the insertion of threads, can pose an issue. Make sure you are thorough when filling out your consultation form.

PRE/ AFTERCARE TREATMENT PREPARATION

It is imperative that you prepare your skin 2-4 weeks before this treatment.

We recommend tyrosinase inhibiting products such as Dermaviduals bespoke pigment punch serum, oleo gel plus LED, Dermaviduals sunscreen. 30-50 + sunscreen must be applied for 3 months after the treatment.

WHAT SHOULD I EXPECT FROM THE TREATMENT?

The treatment itself is relatively straight forward. There will be a degree of swelling when treating the eye area this usually goes down 3-6 days after the treatment. Micro scabs will form at every treatment point, these will slough off after 3 -7 days, but may take more than a week to clear altogether. An aftercare package will be given to you after the treatment to aid healing. Once healed, you will discover a radiant, more youthful look to your skin. Ongoing skin care regime is required for maximum longevity of this treatment as well as sunscreen. Bring a large hat and sunglasses to your treatment to avoid any UV exposure after treatment.

HOW MANY TREATMENTS WILL I NEED?

A single treatment usually achieves the desired results. The procedure can be repeated 3 months after the initial treatment if you wish for further lifting or tightening. The treatment is permanent, so you will only need to repeat it many years down the line as we continue to age.
