

# Plasma Non Surgical Skin Tightening

Plasma Technology is a rapid and effective alternative to skin tightening surgery. This is a gentle and low pain procedure that achieves incredible and permanent results.

The Plasma pen creates an ionised electric arc that acts dermally on the skin without the machine touching the surface. Once the arc touches the surface of the skin it vaporizes the skin in the desired location and this stimulates the surrounding area to tighten.

|   |        |
|---|--------|
| Plasma Skin Tightening Consultation (30 mins)   | \$30   |
| Upper lid lift  | \$800  |

| Tattoo removal - size up to 12cm x 12cm | \$200 |
| Tattoo removal - size up to 15cm x 15cm | \$300 |

## Non Laser Tattoo Removal

### SALINE

*Saline Removal is a non laser option for tattoo removal. A highly concentrated amount of salt is tattooed into the skin which is then removed externally instead of internally. This allows the pigment particles to be released from a scar rather than to be excreted through the human waste system. This is done over a series of treatments and is a great option for cosmetic tattoo removal if laser is not suitable.*

|  |       |
|--|-------|
| Non Laser removal - 1st session          | \$235 |
| Non Laser removal - consecutive sessions | \$200 |

## Lash & Brow Treatments

| Brow tint                  | \$10  |
| Eyelash tint               | \$25  |
| Henna brows (includes wax) | \$50  |

## Skin Treatments

|                                     |       |
|-------------------------------------|-------|
| Express Synergy Peel (30mins)       | \$70  |
| Acne Peel with extractions (1 hour) | \$120 |

*AHA and BHA peels- Our lactic acid peel is an active yet gentle exfoliating treatment that aids dehydrated, sun damaged and pigmented skins. It amplifies natural moisture properties to help achieve the appearance of a firmer and brighter skin. Along with the lactic peel we also have a salicylic acid peel which provides a deep thorough cleansing of congested pores. Salicylic acid is best designed for acneic skin and helps to calm a red skin as well as managing any further flare ups.*

|                                     |       |
|-------------------------------------|-------|
| Diathermy red vein removal - 15 min | \$40  |
| Diathermy red vein removal - 30 min | \$70  |
| Laser Pigment removal consultation  | Free  |
| Laser Pigment removal               | \$200 |

*Laser pigment removal can help remove a variety of epidermal and dermal pigmentation types including Lentiginos, Ephelides, Epidermal melanosis, Nevus of Ota, Nevi, Mongolian spot, Melasma and deeper pigment.*

|                   |       |
|-------------------|-------|
| Laser Carbon Peel | \$180 |
|-------------------|-------|

*The laser carbon peel blasts away dead skin cells and works on a cellular level (deeper layers of tge skin). It improves skin tone and texture, helps to firm the skin, reduces pore size and appearance of fine lines whilst also helping to remove pigmentation as well as acne and acne scarring. The laser will also stimulate collagen and elastin production in order to promote healthy skin cells.*

|  |       |
|--|-------|
| Laser Pigmentation removal plus carbon | \$300 |
| Combination Laser                      | \$300 |
| Collagen Induction therapy             | \$300 |
| Collagen Induction therapy x3          | \$750 |

*Collagen Induction therapy (skin needling) is a clinical treatment that aids with fine lines, sun damage and scarring. Performed with a sterile skin needling device, this treatment assists in the improvement of skin texture by stimulating collagen and encouraging wound healing. A course of treatments help achieve the appearance of a rejuvenated and refined skin.*

|                           |        |
|---------------------------|--------|
| Laser Genesis 3000 shots  | \$200  |
| Laser Genesis 6000 shots  | \$400  |
| Laser Genesis 9000 shots  | \$600  |
| Laser Genesis 12000 shots | \$800  |
| Laser Genesis 15000 shots | \$1000 |

*Laser Genesis is a treatment that works to help tighten the skin and is effective for treating excessive redness, large pores, uneven texture, fine lines and facial wrinkles. By gently heating the upper dermis well below the skins surface, laser genesis improves the appearance of wrinkles through collagen stimulation. Substantial scientific research has shown the laser genesis to produce new collagen and help improve the tone, texture and appearance of treated skin.*
